

[Cirque du Soleil 60 minutes special](#)

Good morning to all my students at Hyde-Adisson ES.

For this week we are going to do a music appreciation exercise, at the top of this document you have a link to one of the Cirque du soleil special show. In this special you will find excerpts from three different shows. This shows are: Kurios," O" and Luzia. The meaning of watch this show is to help us understand and learn how the music is used is different performances, not just at a concert or a musical show. All this shows has real musicians playing at different hide spots, that is the reason you can't see them all the time. One of the important facts that you must put special attention is that every performance is link with the music playing at the background, making the music an essential part of the show. When you finish to watch the whole show you will answer this three questions:

1. What part of the special was your favorite? Why?
2. What part of the special you didn't like? Why?
3. What instruments can you identify just by hearing the music?

On Thursday April 30, 2020, at 1:00 pm, I will doing a live stream at the Microsoft team to talk about the show and you can share your different answers.

Enjoy the show. Stay safe.
